SUMMARY

Full-stack developer with around 3 years of experience building scalable web applications using React.js, FastAPI, and MySQL. Skilled in RESTful APIs, real-time workflows, and intuitive UIs. Experienced with third-party API integrations (Shopify, eBay), and Agentic AI (vector DBs, embeddings, RAG). Recognized for clean code, problem-solving, and delivering user-focused solutions.

SKILLS

Languages : JavaScript, Python
Frontend Development : React.js, Next.js, Typescript, Redux, Jest, Material-UI, HTML, CSS
Backend Development : FastAPI (RESTful APIs), API documentation (Swagger), Unit testing (Pytest), Load testing (Locust)
Databases : MySQL
DevOps & Tools : Git, GitHub, AWS, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Activant Solutions PVT LTD
Web Application Developer   **September 2025 - Present**

- Frontend development of an enterprise SaaS app for Shopify merchants using Next.js, React.js and Polaris.
- Implemented background jobs and async workflows in node.js, reducing response latency by 40%.
- Built a responsive, high-performance UI using Next.js, React.js and Shopify Polaris & Developed analytics dashboards, points, and rewards modules.
- Ensured scalable, reusable UI components and a seamless user experience.

Infoshor Software PVT LTD
Associate Software Developer   **February 2023 - August 2025**

- Developed and maintained web applications using React.js, Python and MySQL.
- Improved system performance and scalability through optimized database design and AWS deployment.
- Collaborated with cross-functional teams to deliver user-focused features and reduce delivery time.
- Ensured high code quality through best practices, code reviews, and Git.

PROJECTS

Shopify eBay Importer

- Built an integration platform to sync and manage products across Shopify and eBay.
- Implemented real-time product fetching with AWS SQS & Lambda and designed a dashboard for sync status and analytics.
- Added user profile management, product import/export, and AI-driven category suggestions & error resolution using embeddings, vector DB, and prompt-based agents.
- Tech stack: React.js, FastAPI, Shopify/eBay APIs, AWS (SQS, Lambda), AI embeddings, vector DB.

Amazon Associate Connector

- Built a dropshipping solution enabling Shopify merchants to import products from Amazon using product URLs.
- Developed multi-page UI with React.js, Shopify Polaris, and Redux including analytics dashboard, product import preview, and product management pages.

- Added debounced API-driven product fetching and seamless publish-to-Shopify functionality.
- Implemented filtering, sorting, and delete options for imported products, along with subscription plan & pricing pages and FAQs.

FavLoyalty – Loyalty & Rewards Platform

- Built an enterprise SaaS app for Shopify merchants with loyalty points, referrals, and tiered rewards.
- Designed a merchant-friendly UI using Next.js and Shopify Polaris, improving usability and reducing onboarding time.
- Delivered features like analytics dashboards, points settings, redeem settings etc.
